Professional Summary

Full-Stack Software Engineer with 4+ years building scalable web applications in React.js, Next.js, Node.js, and Express.js across TypeScript, MongoDB, MySQL, and PostgreSQL. Serve as lead developer on real-time monitoring dashboards, interactive data visualizations, admin platforms, background job processing, and secure REST APIs, working closely with development teams, design, and QA to ship production features end-to-end.

Technical Skills

Frontend	React.js, Next.js, JavaScript, TypeScript, Redux, Jotai, React Hook Form
Backend	Node.js, Express.js, REST APIs, GraphQL, BullMQ
Databases & ORM	MongoDB, MySQL, PostgreSQL, Prisma ORM, Drizzle ORM, TanStack Query
Auth & Security	JWT, Role-Based Access Control (RBAC), Secure Authentication
Data Visualization	D3.js, React Flow, XYFlow, Real-Time Charts/Graphs
DevOps & Tools	Docker, Kubernetes, AWS (S3), Git/GitHub, Vite, Postman

Experience

Software Engineer

Technostacks

Gujarat, India

Jun 2025 – Present

- Build production web applications with React.js, Next.js, Node.js, TypeScript, Tailwind CSS, Jotai, TanStack Query, and React Hook Form.
- Serve as lead developer on the **Aryos AI** solar monitoring platform, working alongside a development team to deliver real-time generation dashboards, multi-step onboarding flows, automated reporting, configurable notifications, and a super-admin control panel.
- Lead development of interactive research visualizations for the **Jaina** digital-humanities platform, including relationship networks, family trees, hierarchy/precedence/lineage graphs, and interactive maps.
- Integrate REST APIs, third-party services, and scheduled background jobs across multiple production applications.
- Partner with backend engineers, designers, and QA to take features from requirements through to production release.

Software Engineer

V2 Solutions

Vadodara, India

Jul 2023 – Apr 2025

- Developed full-stack HR and project-management applications using React.js, Node.js, Express.js, and MongoDB.
- Built admin modules covering attendance, leaves, timesheets, helpdesk, performance management, expenses, travel, reporting, and employee separation.
- Developed secure REST APIs with JWT authentication and integrated frontend applications with backend services.
- Optimized database queries and built reusable application modules, improving performance and maintainability.

Freelance Backend Developer

Pond Splash

Remote

Apr 2023 – Jul 2023

- Designed and built Node.js/Express.js APIs on MongoDB for managing customer orders.
- Integrated automated email notifications (Nodemailer) and recurring scheduled tasks (NodeCron).

Web Developer

iPangram

Remote

Oct 2021 – Mar 2023

- Developed backend services and secure REST APIs using Node.js and Express.js.
- Collaborated with frontend engineers to integrate APIs and resolve development/production issues.
- Refactored legacy backend modules to improve readability, performance, and maintainability.

Flagship Projects

Aryos AI – Solar Energy Monitoring Platform *React, Node.js, TypeScript, PostgreSQL, Drizzle ORM, AWS S3, Docker*

- Built a solar-energy monitoring system tracking generation, system performance, and estimated savings, with real-time charts refreshed every 5 minutes across daily/weekly/monthly views.
- Delivered automated daily/weekly PDF reports and manual, automatic, and scheduled notifications configurable by category, city, and PIN code, powered by BullMQ background jobs.
- Built a super-admin panel for managing clients, staff, roles, sites, solar systems, devices, reports, and notifications; developed multi-stage onboarding for solar sites, inverters, MPPTs, PV modules, and strings; integrated with Zoho dashboards.

Jaina – Digital Humanities Research Platform, Stanford University *Next.js, React, D3.js, React Flow*

- Built a public research website (Next.js) and an admin data-management panel (React) enabling researchers to create, connect, and organize people, scriptures, events, locations, and families.
- Implemented interactive relationship networks, family trees, hierarchy/precedence/lineage graphs, and geographic maps with dynamic interactions and animation using D3.js and React Flow.

Other Projects

- **V2 HR & Project Management Platform** – React modules for attendance, leaves, timesheets, helpdesk, performance management, expenses, travel, reports, and separations.
- **Magirsha Industries Inventory System** – React.js/Express.js/MySQL system for products, raw materials, production tracking, and RBAC.
- **DXC Technology Dashboard** – React/Redux Toolkit admin dashboard with REST-based real-time SEO tracking, deployed on AWS with Nodemailer alerts.
- **Healing Leaves PharmaCann (Healthcare)** – Virtual consultation and medicine-ordering platform with government API integration and role-specific doctor/patient dashboards.
- **Delonghi Return Label Generator** – React app using the FedEx Web Services API to generate/print ZPL barcoded return labels, with return-status tracking.
- **RateChecker API Automation** – Node.js script tracking mortgage rates via XML APIs, with automated NodeCron/Nodemailer email alerts and MongoDB storage.
- **Additional builds:** CONMIX RMC (Next.js), Chardon Home Loan (React.js), LJ Future Skills (React.js), Fiken No API (Node.js), Meds Tracker (Node.js), Premium Sports Ticket Booking (Node.js).

Education

Bachelor of Engineering in Computer Science
Babaria Institute of Technology

Jun 2017 – Jul 2021
CGPA: 8.27 / 10

Additional Information

- Experienced building responsive, reusable, and accessible UI for desktop and mobile applications.
- Comfortable with Git-based workflows, API testing/debugging, code review, and Agile development.
- Familiar with containerized deployments using Docker and Kubernetes.
